

**Remember: 1 litre  $\approx$  1.75 pints**

**1 pint  $\approx$  0.568 litres**

**1 gallon  $\approx$  4.55 litres**

**1 litre  $\approx$  0.22 gallons**

**Examples:** Change each of the following measurements into the units given.

**1) 3 litres into pints**

**$\approx 3 \times 1.75$  pints = 5.25 pints**

**2) 4 gallons into litres**

**$\approx 4 \times 4.55 = 18.2$  litres**

**Exercise:** Change each of the following measurements into the units given.

1. 40 litres into pints.

8. 28 pints into litres.

2. 6 gallons into litres.

9. 40 litres into gallons.

3. 5 pints into litres.

10. 2.3 litres into pints.

4. 3 litres into gallons.

11. 7 litres into gallons.

5. 9 litres into pints.

12. 65 litres into pints.

6. 14 gallons into litres.

13. 12 gallons into litres.

7. 0.5 gallons into litres.

14. 800 pints into litres
