

Remember: 1 cm = 10 mm

1 m = 100 cm

1 km = 1000 m

Examples: Change each of the following measurements into the units given.

1) 3 m into cm

$$= 3 \times 100 \text{ cm} = 300 \text{ cm.}$$

2) 4000 m into km

$$= 4000 \div 1000 = 4 \text{ km.}$$

Exercise: Change each of the following measurements into the units given.

1. 4 cm into mm.

9. 3600 cm into m.

2. 30mm into cm.

10. 30 m into cm.

3. 6m into cm.

11. 200 cm into mm.

4. 7 km into m.

12. 20 km into m.

5. 800 cm into m.

13. 9 m into mm.

6. 440 mm into cm.

14. 2.4 m into cm.

7. 1900 mm into cm.

15. 9.3 km into m.

8. 9000 m into km.

16. 92 mm into cm.
