

Tip: Re-write all of the decimals to have the same number of decimal places.
It makes the question much, much easier.

Example: Arrange in order, smallest first: 4.06 4.6 4.16 4.1
Re-write as: 4.06 4.60 4.16 4.10

We can now see the answer is: **4.06 4.1 4.16 4.6**
