

**Tip:** Re-write all of the decimals to have the same number of decimal places.  
It makes the question much, much easier.

**Example:** Arrange in order, smallest first:      4.06   4.6   4.16   4.1  
Re-write as:    4.06   4.60   4.16   4.10

We can now see the answer is:      **4.06   4.1   4.16   4.6**
