

Example:

What percentage of £250 is £50

First, express as a fraction $\frac{50}{250}$

Then, change to a percentage $\frac{50}{250} = \frac{10}{50} = \frac{20}{100} = \mathbf{20\%}$

1. What percentage of £60 is £15?

2. What percentage of 5 metres is 1 metre?
